

Over 60 year's of experience serving the industry.

Thanks to a high-profile professional management team, we are able to meet and interpret the needs of our customers to provide them with the best business solutions.

Teamnetwork also offers a platform of integrated services in industrial processes, in the real estate sector and in renewable energy.

HEAVY LIFTING EQUIPMENT

CIVIL SECTOR

Launching gantries, handling equipment for infrastructures and for the prefabrication site.

Our equipment is for infrastructure construction, such as bridges, viaducts, flyovers, tunnels, dams, jetties, ports etc., tailor-made machines made applying our experience to specific customer projects.

Our range of products include:

- launching gantries for segmental precast elements
- beam launchers for "I" and "T" beams
- full span launching gantries
- tire trolleys
- Mobilifts, straddle carriers for handling precast elements
- special gantry cranes for shafts for tunnel construction
- MSV multi service vehicles for tunnel construction

PORTS

Special cranes and innovative solutions for revamping – Carbon reduction solutions.

Our company can design and manufacture brand new, **tailor-made**, competitively priced machines for container handling and bulky loads.

Especially **Ship loader/unloader**, level-lugging cranes for any type of material.

In addition, we are specialists in revamping and upgrading old machine structures and systems, applying the latest technologies, bringing them back to life.

Our machines and solutions have the lowest environmental impacts to help port meet today environmental restrictions.

VISION

Our **leading engineers** have been working in the heavy lifting equipment sector since the early 1980s. In the design and production of these types of machine for multiple sectors, our engineers have enabled our team to deliver machines of top quality and effectiveness, at competitive prices.

Our first concern is to meet customer expectation in terms of performance, usability and economy, then providing support in after sales, being constantly accessible to our customers and, being **proud of our relationship**.

MISSION

Meeting customer need better than our competitors: our company is bringing an innovative approach to the heavy lifting equipment sector, **providing comprehensive solutions to our customers** for an effective total solution, based on our personnel having over 30 years' experience.

MARINE & SHIPYARD

Equipment for boat handling and vessel construction.

Travel-lift, marine hoist and boat trailers with a capacity of up to 1300t, tailor-made to customer needs, fast and reliable to undertake any operation with maximum efficiency.

Low carriers, tire trolleys, for transportation of boat segments within the shipyard.

Goliath crane for boat segment assembly.

Jib cranes on rails for boat assembly.

Beside the traditional **hydrostatic solution**, diesel-hydraulic power pack, we offer innovative green solutions: electric machines with battery packs or fuel cells.

An environmentally friendly solution exists for marinas, shipyards and ports who have targets to meet in relation to carbon emissions, oil leaks and noise pollution.

INDUSTRY

Equipment for handling finished and semi-finished products or any heavy load.

Our gantry cranes on tires, called Mobilifts or straddle carriers, and low carriers can solve any problem related to the logistics of heavy loads because of their flexibility, handling and fully customized to each specific need.

Our machines are self-propelled hydrostatic or fully electric and controlled by remote control.

Our machines and solutions are highly efficient, with the lowest environmental impact to meet the highest environmental restrictions.
